

Which are the benefits and challenges ?

WORLDWIDE
PARTICIPATION
CONFERENCE
LONDON 2019

- The benefit is to have a global and worldwide vision concerning abilities of players. Regardless countries and their organizations, the most important aspect is to consider “the level of play”
- In modern and moving society, tennis players will have the possibility to increase their rating anywhere a match is played
- The challenge is to transfer all existing national ranking systems (age, genders, particularities, etc) to WTN
- Ensuring fairness of all countries regardless the strength of the federation
- Accept that WTN could be only an « asset » for some nations who have a well developed system of ranking
